

COVID-19 RETURN TO WORK STAY AT WORK

As the federal, state, and local governments are starting to unveil their return to work plans, employers need a strategy to resume operations and get employees back to the workplace.

NMS Management Services, Inc. has been on the frontlines, testing Florida's First Responders since the pandemic began. We have created an easy to execute Return to Work, Stay at Work strategy based on CDC and Department of Health recommendations.

Return to Work, Stay at Work Strategy Includes:

- Virtual doctors' appointments to provide immunity prescription to employees
- In-office Antibodies/Serology Testing through Quest Diagnostics and LabCorp
- Temperature screening toolkit
- MD Certified Return to Work Form
- HIPAA compliant tracking system for high risk employees who require continued monitoring

SAMPLE RETURN TO WORK, STAY AT WORK PROTOCOL

► RETURN TO WORK

- Temperature checks and evaluations for all employees on Day 1
- Symptomatic employees are not allowed to enter the building
- Conduct parking lot PCR (Polymerise Chain Reaction) Test to determine if employees currently have the virus
- IgG Immunity Baseline Antibodies Test for ALL employees
- Track data using a dashboard view of employees based on risk

► STAY AT WORK

- **IgG Negative** patients:
 - *PPE required*
 - *Monitor temperature daily*
 - *If symptoms develop, evaluate and give PCR Test*
- **IgG Positive** patients:
 - *PPE not required, as they have immunity*
 - *Repeat IgG Immunity Baseline Antibodies Test monthly*

*Disclaimer: The COVID-19 Immunity (IgG) test does not directly detect the virus and should not be used to diagnose or exclude COVID-19 infection. A negative result may occur if you are tested early in your illness and your body hasn't had time to produce antibodies to infection. Even if your COVID-19 Immunity (IgG) test is positive, that does not mean you are immune to COVID-19. If you suspect you may be infected with COVID-19, you should talk to your healthcare provider, and direct testing for the virus, COVID-19, should be performed.
